Introduction

Experienced full-stack software developer with a strong focus on creating quality products. My curiosity and drive to learn have led me gain expertise also in ci/cd tools, docker and cloud technologies.

My philosophy is to be able to create products from developing, testing, deployment, and maintenance.

Education

MS Alexandru Ioan Cuza University, Faculty of Computer Science

• **Coursework:** Advanced Methods in Software Engineering, Java Technologies, Architecture and Practical use of Cloud Services

Romania, Iași Oct. 2022 to June 2024

BS Alexandru Ioan Cuza University, Faculty of Computer Science

Coursework: Data Structures, Operating Systems, Object Oriented Programing, Algorythm Design, Genetic Algorithms, Computer Networks, Advanced Programing, Programming Engineering, Web Technologies, Neural Networks, Multiprocessor Programming Techniques, Cloud Computing

Romania, Iași Oct. 2019 to June 2022

HS Nicolae Iorga High School, Math and Computer Science

Romania, Brăila Sep. 2015 to May 2019

Experience _____

Bandwidth, Software Developer

 improve existing REST APIs ensuring code readability and efficiency by using the Spring Boot framework and always strive for optimisation and best practices. During this time I also got the chance to learn more about Maven and Gradle as well as Docker Compose. Romania, Iași Jan. 2023 to present 1 year 5 months

- deliver high quality ui interfaces using Angular and React frameworks.
- this experience had led me become a better software developer by always having new challenges and also had the chance to contribute with my own ideas and have ownership to the features I built.

Amazon, Software Engineer, Intern

- during the internship project, I had the opportunity to learn and work with many AWS services including Lambda, EC2, Cloud Formation, Elastic Search, IAM, S3 and more. The project involved building a REST API with Typescript enabling customers to efficiently search their template images for banners. By completing the project ahead of the deadline, I could work on improving the customer platform, Freeway.
- Romania, Iași July 2022 to Nov. 2022 4 months
- my curiosity also led me have a deeper understanding of Git and how NodeJs
 works by having allocated learning time where we could explore anything we want.

Continental, Software Developer, Intern

using a STM32 microcontroller with C Embedded, we developed a system for automatic brake detection for motorcycle. My role was creating the software behind it and develop a real time plot to help us see when the brake is detected.

Romania, Iași July 2022 to Nov. 2022 9 months

Additional Experience _____

ASII, Volunteer

- volunteering helped me develop my social skills, technical abilities, and discover my passion for fotography.
- I had the opportunity to take several initiatives, including developing the ASII Dashboard app, creating and managing the **GitHub Organization**, as well as architecting and integrating **GitHub Action** pipelines for a seamless release process.

Romania, Iași Oct. 2022 to present 1 year 8 months

Faculty of Computer Science, Teaching Assistant, Seasonal

- laboratories: Advanced Programming
- helped students understand various **Java** topics, including best practices, streams, JPA, Spring Boot, multithreading, and more.

Romania, Iași Feb. 2023 to present 8 months

Dec. 2023 to present

Oct. 2021 to June 2022

Projects _____

ASII Dashboard

- multi-purpose platform that scans and sends tickets with QR code to participants
 of ASII events, enabling the organization team to track participants presence in
 real time. The platform also serves as an URL shortener to track the reach of links.
- used: Angular, Express, Typescript, Python, MongoDB

Academic Activity Dashboard 2

- application that helps centralizing the flow of data between professors, students
 and secretariat. It can export data inserted by students in csv format, send emails
 to users, generate daily activity paper for all coordinators, and have an easy way
 of managing the users with an admin panel.
- used: Angular, Express, Typescript, PostgreSQL, Docker Compose

Feb. 2020 to Feb 2024

- web application popular among students with useful materials .
- used: Angular

Sorting Algorithms Visualized

- desktop application made for education where the popular sorting algorithms can be visualised in real time.
- used: Java, Processing

Apr. 2019 to Aug. 2021

Technologies _____

Languages: Java, Typescript, Python, C/C++, SQL, HTML, CSS

Frameworks: Angular, React, Spring Boot, Express

Databases: PostgreSQL, MariaDB, MongoDB

Tools: AWS, Github Actions, Docker, Docker Compose, Git, Maven, Gradle

Soft Skills _____

Curious, Self Learner, Teamwork, Problem Solving

Hobbies

Astronomy, Film Photography , Volunteering, Guitar
